

# The Solution to the Limitations of PVC Jacket UT Cables: Echo's Silicone Single and Dual UT Cables

No Other Cable Competes With This Flexibility  
and Temperature Range.

- Flexible to -40°F/C
- Continuous use to 350°F / 177°C
- Never stiff – never coils
- Optional fiberglass sheath provides enhanced protection for rugged use and extends the temperature from 350°F / 177°C to 450°F / 232°C
- Any connector – any length

## SINGLE

Dual silicone cable with Olympus plug and connector guard

## DUAL

Dual silicone cable with fiberglass sheath and Lemo connectors
