

The Solution to the Limitations of PVC Jacket UT Cables:

Echo's SuperFlex™ Single and Dual UT Cables

No Other Cable Competes with the Flexibility and Temperature Range of the SuperFlex Gray Cable.

- SuperFlex cables for all seasons:
 - Flexible to -40°F/C
 - Continuous use to 500°F / 260°C, intermittent to 650°F / 343°C and 750°F / 399°C for brief touches.
- Never stiff – never coils
- Optional fiberglass sheath provides enhanced protection for rugged use
- Any connector – any length

SINGLE

Single SuperFlex cables with and without fiberglass sheath

If it isn't gray, it isn't SuperFlex!

Dual SuperFlex cable with Olympus plug and connector guard

DUAL

Dual SuperFlex cable with fiberglass sheath and Lemo connectors
