Save Time, Reduce Cost and Improve Safety and Performance

with Echo Ultrasonics® Couplants

Save Time!

- Order direct – worldwide delivery.
- Same day shipping.
- All couplants and sizes in stock.

Reduce Cost:

- Guaranteed 10% less than competitive couplants.

Improve Safety & Performance

SuperSoniX™: Echo's highest performance water based couplant; doesn't thin with corrosion salts, reduces re-application.

EchoPure™: Ideal for phased array (reduces artifacts) and very cold or warm inspections (-60˚ to 350˚F / -51˚ to 176˚C).

EchoTherm™ Extreme: Eliminates auto-ignition risk; safe in ports above 775˚F / 412˚C. Less smoke, no residue.

VersaSonic®: The most versatile ultrasonic couplant with two viscosities optimizing inspections from high temperature to working in mud and snow (-10˚ to 750˚F / -23˚ to 371˚C).

AUT Fluids: Several viscosity fluids to optimize pumpability and reduce run-off.
