AeroSoniX™

Exclusively for drones –
High temperature UT couplant that pumps like a fluid, stays in place like a gel.

Broad temperature range -50°F to 775°F (-45°C to 412°C)
Auto-ignition Temperature: 820°F / 437°C

Fast wetting due to low surface tension– no wait time

- Optimal viscosity
- Low evaporation rate
- No residue, varnish or corrosion in drone pumps
- Non-corrosive, and is not reactive to metals or plastics
- No pump reservoir cleaning required
- Air bubble-free
- Non-toxic, environmentally benign

Packaged in 8-oz/237 ml bottles, quart/liter, and 1-gallon/3.8 liter containers.
